LSZ45 had a positive dye test and "high PID" at 211'. I could not be onsite yesterday, but I got that message from AMEC's field geologist today.

LSZ45 (Sossaman Rd) was completed yesterday with screen from 210 - 220.

LSZ30 and LSZ31 were to have been constructed yesterday, but I haven't heard what the screen depths were, assuming they were constructed. Also haven't heard final well construction details on UWBZ29.

Subject: 2016-6-9 - wafb - thanks - what is well completion status - 3 open borings on wed june 8 - ST012 EBR

Thank you. No drilling until Tues June 14, 2016. Of the 3 open borings (as of Wed., June 8, 2016) do you know what wells will be completed, if any before Tuesday? And well screen intervals?

FYI - Today, I will be in meetings from about 11 AM until 5 PM.

Thanks.
